

Webpage Structure

1. Open Notepad++ and type in the following code:

```
1 <html>
2
3 <head>
4     <title> </title>
5 </head>
6
7 <body>
8
9
10
11 </body>
12
13 </html>
```

Save the file as **basic-structure.html**

2. Add the following to the page:
 - a) Give the webpage the title of 'Beginning HTML'
 - b) Give the page a main heading of 'Basic Webpage Structure'
 - c) Add a paragraph describing what HTML is.

Save the changes and test the page in a web browser.

Points to remember

- Web pages are structured using elements (also known as tags).
- Elements should be written in inside angle brackets in lowercase – although not a rule, modern web pages are coded in lowercase.
